

Date: May 2011

Job Title: Telecom Analyst

Job Function: Financial and economic analysis and modeling, market research, statistical analysis, management consulting, report writing

Position Type: Immediate Full-Time

Desired Majors: Business/Economics, Business/Administration, Engineering/Electrical, Science/Physical/Math & Statistics

Desired Degree Level: Undergraduate, Masters Degree or equivalent experience

Job Description: The Telecom Analyst will support the activities of the key consultants at the firm. Analysts are primarily responsible for generating and inputting appropriate financial and economic data into databases and/or spreadsheets, retrieving source documents, and other information search including both financial and statistical data.

Under limited supervision, the Telecom Analyst will also perform some or all of the following:

- Identify and follow up on appropriate sources of information
- Extract financial and economic data from source material
- Generate reports from LYA databases and/or spreadsheets
- Work in conjunction with senior analysts in preparing necessary information and analyses for publication in market research reports or for documentation as part of client mandates
- Maintain strict adherence to deadlines
- Maintain related records, source materials, analyses and files
- May answer mail or telephone inquiries

Qualifications:

- An undergraduate degree in Business Management, Finance, Commerce, Economics, Engineering or Math, or similar degree at Masters level
- Strong verbal communication skills in English and in French
- Strong analytical skills
- Strong written communication skills in English and in French
- Strong abilities in developing spreadsheets and developing and updating databases
- A good knowledge of statistical analyses is a key advantage
- The ability to work well in small teams
- Customer service orientation
- The ability to organize, meet deadlines and to multitask
- Good problem solving skills
- A keen interest in telecommunications and media services and technologies is a key asset
- Prior experience at a major telecom service provider is a key advantage

Job Start Date: Immediately
